Hey Sohan, we're ready to approve the extra 5 days, do you need me to approve it right now? I can also approve it tomorrow morning, which will be your night today

Me

Apr 10, 2025, 11:09 AM

I've sent you the request.

figueroadaniel

Apr 10, 2025, 11:09 AM

It's done, thanks  
keep up the good work

Me

Apr 10, 2025, 11:09 AM

Thanks!

Me

Apr 12, 2025, 10:45 AM

Hello There,

Hope you and your family are safe and sound.

In the last meeting, I mentioned that I encountered an error on the S3 AWS server. Because of that error, the static content is not functioning properly.

Now I have fixed this error, and you can access the admin dashboard and start uploading the content.

Please take a look at this instructional video I have created for you: <https://app.usebubbles.com/pYyCZksGzH2ku6DxQJuxXS>.

After uploading the content, we started to run another test. If we found any issues, we solved them and launched the application on the store.

If you have any questions or concerns, please let me know. I'll get back to you as soon as possible.

Best regards

figueroadaniel

Apr 13, 2025, 9:01 AM

Hey Sohan, good morning  
We are currently working on setting up all the content in the admin dashboard, as of now all the questions of "quickie" are up, as well as some fest rules and games for testing purposes, before we proceed to upload all the content.

We also have provided a game session for testing purposes, so that whenever you're working on the app and want to test it, you could use that one, it's a game session for Quickie.

We are also going to need to update the splash screen images, which you will find the new ones in the .zip file in this message, the order is in the files (1-5).

Furthermore, we would like to schedule a meeting on Monday 14th, 9:00 AM your time, there's a couple questions and comments we have regarding the admin dashboard and future updates.

Have a great day, thanks!

figueroadaniel

Apr 13, 2025, 9:03 AM

Here's the zip file with the splash screen photos, thanks Sohan!

Hello Figueroadaniel,

Thanks for the feedback. I'll work on this and update you soon on that.

Yes I am available on Monday at 9:00 AM. Just drop me a message over here then I'll send you the meeting link. See you soon.

Regards

figueroadaniel

Apr 14, 2025, 9:00 AM

Hey Sohan, good morning, we're ready for the meeting

figueroadaniel

Feedback:

- When opening the app, an unexpected screen appears before the actual splash screen: it shows the Fest logo inside a circle. This screen was never requested. Additionally, even the actual splash screen fails to display the 5 images it is supposed to – only 3 appear. This gives the impression that the app is buggy and unoptimized from the start.
- Google login doesn't request any additional permissions or notify the user about the type of data it will retrieve from their Google profile. This is a serious privacy issue. (we talked about it in the meeting so if you guys can ensure that it's all good the way it is and it's compliant with GDPR and there won't be any issues in terms of data privacy and usage, then all good on that, we do have very specific terms of usage and privacy policy so if that's enough then good.)
- The Profile screen is completely broken – it only shows a gray rectangle covering the whole screen.
- The language switcher is not working. Even after selecting a different language, the game content remains in English while the app displays in Spanish.
- All game modes (Deck card with the colors, character, name, description, and example card) should be "preloaded" to avoid showing a loading animation to the user, which currently makes the app feel cheap or buggy. The content itself (like cards) can be fetched online once the modes are purchased or a subscription is active. (All the game modes that are purchased or if there's a subscription active then those game modes should be available offline, quickie should not be available offline if there's no purchase or subscription, because of the ad. with that being said, quickie should become ad-free if the user purchase any game mode or subscription, look at it as a "gift" if you may)
- Once the content is loaded on the user's device, it should remain stored locally, so that it's available offline

**F** **figueroadaniel** Apr 17, 2025, 11:48 AM  
- Quickie mode has to have a 30-second ad (with the option of skipping after 15 seconds) so that the user can see it. An ad needs to be shown for all the free game modes in the

that the user can access it. But you need to be aware that in the new game modes in the future. (the season modes) we understand that you need from us an account for ads, we'll provide them

- We are aware that none of the game modes (except Quickie) have cards in the admin dashboard, but "even the Quickie cards did not show up in the APK at any point".
- Quickie is currently being displayed in the store, which should not happen since it is a free mode. Additionally, once a user purchases a game mode, it should appear as "Acquired" in english or "Adquirido" instead of price in the Decks section of the store.
- As a reminder, we need different prices for each region we specify.

**F** **figueroadaniel** Apr 17, 2025, 11:50 AM

Thank you, we will be looking forward to the updates.  
And we're available whenever you guys need a meeting.  
Keep up the good work

**Me** Apr 17, 2025, 2:22 PM
